

SW COLD/PSA FILM

Cold/PSA lamination film, also known as pressure-sensitive adhesive film, offers a versatile and user-friendly solution for protecting and enhancing printed materials. This type of lamination uses high-pressure rollers instead of heat, making it ideal for sensitive materials like photographs and digital prints. The benefits of Cold/PSA lamination include high production rates, durability, and UV protection, ensuring your prints remain vibrant and long-lasting. It is perfect for applications such as posters, book covers, signs, and trade show graphics, making it a popular choice for schools, offices, and the sign industry.
