

Fastbind BooXter Zero Max Binder

About the BOOXTER ZERO MAX

"The BOOXTER ZERO MAX™ is a compact workstation compatible with the most commonly-made books (presentations, yearbooks, manuals, etc.), from miniature to SRA3+ up to 20 mm (0.78") thick. You can make printed hard and soft covered books, strip-back books, and more. The BooXTer Zero Max system will bind the largest amount of pages in the BooXTer family. Rugged but light-weight, it includes a professional heavy duty stapler. The table is designed with a built-in book block spacing system to make the placement of the book block in the cover perfect every time!"

Specifications

- Print hard and soft covers
- Creates up to four different unique styles of books
- Compatible with the majority of commonly-made books
- Warranty: 1 year (Extended warranties available)
- Complete book binding system for soft and hard cover books, including photo books, school yearbooks, and presentations

Supplies

PFS stocks most Fastbind supplies for your book-binding needs, including both PUR and EVA glues, printable covers, end sheets, laminate, and chipboard.

About Fastbind

Fastbind machines are developed and manufactured in Finland by Maping Co., a family-run business that has grown from a small workshop into a leading company of the finishing sector in digital printing environment. Their goal is to be the leader in the field and provide our worldwide customers with the best binding machines for small and medium quantities, first of all orientated towards digital printing. With Fastbind's ever growing line of small and large machinery in the bindery sector they are on their way to accomplishing this goal.

Disclaimer of Content

All or most of the above is written internally at Print & Finishing Solutions (PFS) utilizing many resources. Some of our resources are the opinions of industry professionals, some are published and subject to change, etc. This is our best attempt to organize key aspects of the mentioned machinery to help you make the proper decisions for your business's long-term success. If any aspect of the above is critical to your decision making process, please ask your PFS equipment consultant to document in writing as part of your purchase contract.
