

## GW 3000 Numbering Machine

### Key Features:

- Create snap sets while numbering
- Ability to control depth of Perf/Score/Slit
- Microprocessor controlled with forward and backward stepping for easy programming
- 1 number per head per sheet
- Crash numbering up to 10 part carbon less

The GW 3000 is designed as a mid-volume, automatic number/perf/score/slit machine, ideal for the printer who does more numbering than can be efficiently accomplished on a hand fed machine. With a production rate of 3,000 standard size sheets/sets per hour, the "3000" makes short & easy work of mid-volume runs. Simple set up and ease of operation ensure quality results. Perforating, scoring, and slitting are done before the main rollers on depth controllable holders allowing for fast blade changes.

Machine Specs	
Maximum Number of Heads	2
Maximum Stock Weight	Up to 12 pt.
Speed	3,000 Sheets/Hr.
Paper Size	Min: 3" W 5" L Max: 18" x 18" L
Weight	106 lbs.
Dimensions	44"L x 27" W x 16" H
Power	110-130V 60Hz
