Finish-a-Coil “M”

MAPKFINACOILM

The Akiles Finish-@-Coil M is a bigger and more feature rich version of the Akiles Roll-@Coil. This unit includes larger rollers, a heavier duty motor and a larger footprint that makes it easier than ever to insert coils onto the edge of your books. The Akiles Finish-@-Coil has adjustable full-size rollers that help to make coil inserting surprisingly fast and easy, even on the extra-large diameter sizes. This makes the Finish@Coil ideal for operators that demand versatility & productivity. And a must for all binding centers with large workloads.

Easy Insertion

U-shaped Alignment Channel aids in conforming the spine of larger diameter documents to the coil's shape, for a faster and easier insertion
