## **PAL-M Manual Pick A Lift Paper Stacker**

MASWPALMS

With the PAL-M Manual Picks-A-Lift paper separator, you ensure that your operator is using the appropriate amount of paper to punch each and every time. This unit will increase your punching capacity by 30%. The PAL-M can be used right out of the box in a stand-alone configuration or as a module mounted to any vertical Rhin-O-Tuff punch.

### **Increased Punching Capacity**

The PAL-M is used to optimize the amount of paper to be inserted into the punch reducing the amount of paper jams or inefficient punches.
