UNIBIND LAYFLAT PAPER

It's annoying when books or publications don't stay open. Until recently, only expensive binding techniques made it possible to leave books completely open and flat.

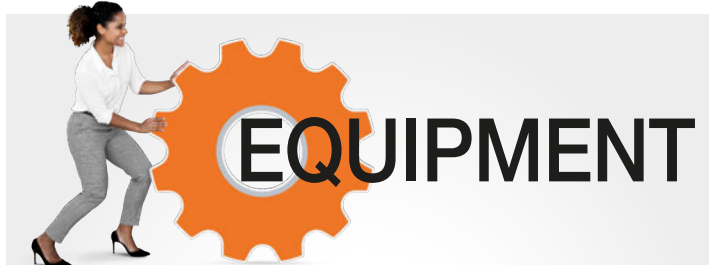

Lay Flat Paper is the perfect solution if you want any kind of publication to stay open. This special lay-flat paper has a fold at the edge so that there's no more bulge in the middle of the book after binding. When the binding is done, you can see a kind of hinge in the book's spine. This is what allows the pages to lay completely flat.
