## AIR PURIFIERS

Air purifiers  
for pure  
indoor air  
- for room  
sizes of 215  
to 1000  
square  
feet.\*

Indoor air contains pollutants up to 5  
times higher than the air outdoors.†

Filter out pollutants such as fine dust, pollen and acarid allergens, pathogens such as viruses, bacteria, and mold spores, cigarette smoke, exhaust fumes, chemical vapors and odors from the air with an Air Purifier. The 360 degree multi-layer HEPA filter system has the highest amount of specialized active carbon and only needs to be changed every 12 months (depending on the intensity of usage).

\* With a room height of 8.2 feet. \*\* Directly at the device's air outlet, practically no particles can be substantiated. All technical data is approximate and subject to change.

## High Quality Control

EASY-Touch control is intuitive and convenient. Functions: on / off, auto, level 1/2/3, turbo, and night mode (AP30 model).

## 360° Multi Layer Filter

The high performing 360° filter consists of a fine mesh prefilter, true HEPA filter, and Active Carbon filter. (AP60, AP80 models).

## Remote Control

Comfort functions also available with the remote control: start timer / stop timer, child lock, and night mode (AP60, AP80 models).

## Filter Condition Indicator

The menu displays the condition of all filter elements. The device automatically indicates a pending filter change (AP100 model).
